

REMOTE TEAM STRATEGY

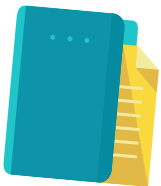

At Regroove, we're experts at helping businesses harness the power of cloud technology. We'll work with you to get your team working effectively from home by helping implement:

1

Collaboration Tools

Leave emails behind and chat with your team in real time. Use Microsoft Teams to collaborate on files, hold chat and video conversations, and link external apps for one central workplace. You can even integrate your phone system to make and take calls from your desktop, laptop, or mobile device!

2

Content Management

Get your documents into the cloud and access them from anywhere. With a content management strategy, global navigation, and collaboration tools, working together has never been easier!

3

Electronic Forms and Automated Processes

Go hands free, get clean data! Replace your inaccessible paper documents with electronic forms and get more out of the information you collect. Get data quickly, set up automated processes, and see insights faster for more efficient business processes.

4

Websites and Online Stores

Take your business online and keep your doors open 24/7! Whether you need a website to describe your services or an online store to sell your products, we can help. We'll create or update a website to give you a modern and branded online presence you'll love to show off.
